

Authentic. Heritage. Home.

Dear residents and businesses in the City of Creede:

Due to a delay in pipe and materials, the "Sanitary Sewer Improvements Project" Phase 1 is now scheduled to begin **approximately on Tuesday July 13, 2021.**

The bid awarded contractor, RMS Utilities, will begin to move equipment and materials into the City starting as early as the week of July 5th, with the anticipation of starting this project on Tuesday July 13th.

The scheduled starting location of the project will be at Cliff Street, then continuing south onto La Garita Street down to the manhole at the alley intersection between E. 1st and E. 2nd streets.

The project will then move to the alley between N. Loma and N. Main Street, starting at the manhole located behind "Wander Off Broadway"/"Tomkins Hardware" area, heading south to the manhole in Basham Park, and then heading in a south east direction across Main Street to the manhole in front of a private building at 116 S. Main Street. This is the first portion of the project, and the goal is to have it completed in time to get cement and asphalt replacements completed before the change in weather.

Please keep an eye on the City's website, facebook account, the public bulletin board, and the post office for any updates in the progress of this project.

RMS Utilities will also be placing door hangers on buildings affected by this project on a weekly basis as well. Their goal is to complete quality work in a timely and efficient manner, with communication being an essential part of this project. As with all construction, there will be some inconveniences, but it will be well worth it once the project is completed.

Your anticipated cooperation and "planning ahead" will be greatly appreciated during this project.
